

INDIAN
SCHOOL
OF PUBLIC
POLICY

Can Public Policies Help In Combating Climate Change?

Emission Reduction Targets

Incentivisation to adopt cleaner technologies & practices by establishing clear and ambitious goals.

Renewable Energy Promotion

Promotion of renewable energy sources, such as solar, wind, and hydropower, by providing incentives, subsidies, and favorable regulations

Energy Efficiency Standards

Promotion of renewable energy sources, such as solar, wind, and hydropower, by providing incentives, subsidies, and favorable regulations

Carbon Pricing

Creating financial incentives for businesses to reduce carbon emissions and investing in low – carbon technologies.

Afforestation & Reforestation

Increasing the carbon sink capacity of forests & mitigating climate change impacts.

Climate Adaptation Plans

Public policies can help communities prepare for and respond to the impacts of climate change.

International Cooperation

Governments can address climate change on a global scale & share best practices and knowledge.

Indian School Of Public Policy (ISPP) academic programme- **The Post Graduate Programme in Public Policy, Design, and Management**, aspires to create leaders who undergo rigorous, training in communication, management, and leadership skills. The Careers Support Cell, assists each scholar in exploring various career pathways aligned with their interests and aspirations.
